Solo and Group Dance & Music Competition

As part of the Co-Curricular Activities (CCA), a special House-wise Solo and Group Dance and Music Competition was conducted for students of Grades 3 to 8 on the theme "Independence Day – Patriotism." The activity was planned to provide students with an opportunity to express their love for the nation through music, dance, creativity, and teamwork.

The competition was conducted on a house-wise basis, with students participating in both solo and group dance and music performances. More than 50 students enthusiastically participated in the event. The house-wise format encouraged students to work together, support one another, and contribute their talents towards earning points for their respective houses.

The best-performing students and groups from the competition were selected to present their performances during the Independence Day celebration on August 15. This provided the selected students with a larger platform to showcase their talent before the school community and made the event a memorable part of the Independence Day celebrations.

This is just the first event conducted housewise and furthermore we will have many such events and competitions for our students from grade 3-8 each. Overall, the event successfully combined patriotism, talent, teamwork, and healthy competition, making it a meaningful and memorable CCA activity with the Music Facilitator, Ms. Prema and Dance facilitator Ms. Chaithanya in the judging Panel.

Independence Day Celebration – Celebrating Freedom and Unity

The Shri Ram Universal School, Jakkur, celebrated the 80th Independence Day with great patriotic fervour and enthusiasm. The celebration began with the hoisting of the National Flag by Managing Director Mr. Ajithesh Basani and Principal Nageveni T Reddy, followed by the National Anthem, filling the atmosphere with pride and patriotism.

The programme commenced with the ceremonial lighting of the lamp, followed by a vibrant cultural programme showcasing the immense talent of students across all grades. The Pre-Primary children delighted the audience with a charming fancy-dress presentation, while students of Grades 1 and 2 presented patriotic songs, solo singing and energetic dances. Students of Grades 5 and 6 impressed everyone with soulful patriotic songs, while Grades 7 and 8 showcased an energetic group dance. Rannvijay Singh added a melodious touch with his keyboard instrumental performance. A special highlight was the musical rendition led by Akshita, Athira and Vedhika Nagineni, which filled the venue with national pride.

The celebration also included a prize distribution ceremony honouring students for their achievements. The Principal's inspiring message encouraged children and parents to promote reading, outdoor play, meaningful interactions and mindful use of technology.

The event beautifully reflected the spirit of "Unity in Diversity" and reinforced the values of patriotism, responsibility and togetherness.

Jai Hind!

CPR Training Programme

On 8th August 2026, a CPR training programme was conducted for teachers in collaboration with **Regal Hospital**. The medical team provided valuable guidance on recognising medical emergencies, activating emergency medical assistance, and performing CPR for both adults and children. A live demonstration using a training mannequin was followed by hands-on practice, allowing teachers to develop practical skills under expert supervision. The session enhanced teachers' knowledge, confidence, and preparedness to respond effectively during emergencies. It also highlighted the importance of timely action and appropriate first response, contributing to a safer and more secure school environment for students and staff.

Building Inclusive Classrooms: Life Without Limits

A teacher sensitisation workshop on Inclusive Classrooms was conducted for teachers from Pre-Primary to Grade 8 by Sheela R.K., SEN Consultant – SELon 08\08\26. Through the theme "Life Without Limits," teachers explored the importance of accepting every learner, providing equal opportunities, and recognising individual strengths. The workshop introduced practical strategies such as visual supports, movement breaks, flexible teaching, differentiated tasks, positive reinforcement, and alternative assessment methods. Interactive case studies, Brain Gym exercises, reflection activities, and sensitisation tasks helped teachers understand diverse learning and behavioural needs. The session reinforced that inclusion goes beyond physical presence, focusing on participation, belonging, emotional safety, and meaningful access to learning for every child.

PTM & Periodic test 2

The CT1 Parent–Teacher Meeting for Grades 3–5 and PT2 Parent–Teacher Meeting for Grades 6–8 was held on 29th August 2026. The meeting provided a valuable platform for parents and teachers to discuss students' academic progress, participation, strengths, and areas for improvement. Meaningful interactions helped strengthen the partnership between parents and teachers, enabling them to work together towards the holistic development, well-being, and continued growth of every child.

National Sports Day – Special Assembly

A Special Assembly on National Sports Day was conducted on 31st August 2026. The significance of National Sports Day was discussed, highlighting that it is celebrated in India on 29th August to commemorate the birth anniversary of Major Dhyan Chand, one of India's legendary hockey players. The assembly also emphasised the importance of sports in developing fitness, discipline, teamwork, perseverance, and sportsmanship. Students participated enthusiastically in the activities and presentations, inspiring everyone to embrace sports and lead a healthy, active lifestyle.

National Sports Day – Celebration

We conducted a special assembly on National Sports Day. Students spoke about why National Sports Day is celebrated on 29th August – birth anniversary of Major Dhyan Chand, the Wizard of Hockey and his 3 Olympic Gold Medals.

We launched our TSUS Sports Theme "Four Pillars of True Sportsmanship – श्रम, श्रद्धा, शक्ति और संतुष्टि" Assembly concluded with National Anthem.

We have conducted Team Sports activities on 25th Aug 2026 for Pre-Primary, Grade 1, 2 and 31st Aug 2026 for Grade 3 to 8.

SPORTS ACTIVITIES

PRE-PRIMARY KIDZ

STATION-1 AIMING THE WICKET

STATION-2 FOREST ZONE (Animals walk)

STATION-3 OBSTACLE ZONE

STATION-4 PACK & DROP

STATION-5 WAVE BALL

GRADE 1 & 2 KIDZ

STATION-1 CONE CRUSHER

STATION-2 PULLING THE TAIL

STATION-3 – BUILD & BULLDOZERS

STATION-4 – DODGE BALL

STATION-5 – TUNNEL BALL

Conclusion: All activities were conducted successfully and all participated in all the activities also had lot of fun and joy.

LogIQids
Every time a little smarter
An IIT-IIM Alumni Venture

LOGICAL REASONING & COMPUTATIONAL THINKING PROGRAM

A dedicated program for students that provides **FREE worksheets** and **assessment**, followed by participation in an International Benchmarking Olympiad.

ELIGIBILITY: UKG TO GRADE 12

STUDENT REGISTRATION

Once the student list is finalized, individual student accounts will be created. The following details will be required:

- Grade & Section
- School Name
- Admission Number

LEVEL 1

COST: FREE

LEVEL 2

Top 10 students will be eligible to participate in Level 2

COST: ₹499

TENTATIVE MONTH: FEBRUARY / MARCH

WHY LOGIQIDS?

Aligned with CBSE Computational Thinking (CT) curriculum

Develops logical reasoning and computational thinking skills through structured worksheets and assessments

Ms. Nayana's: Learning Mathematics the Fun Way

The best angle from which to approach any problem is the 'try-angle'.

Mathematics is much more than numbers and calculations. It is a subject that nurtures problem-solving, logical reasoning, analytical thinking, and creativity. As teachers, our goal is to help children see that maths is not confined to textbooks—it is all around us, in patterns, shapes, time, money, directions, music, and even the games we play.

Over the past three months, our classroom has transformed into a joyful learning space where students have explored mathematical concepts through engaging, hands-on experiences. They have learned by creating patterns, identifying shapes in their surroundings, playing mathematical games, using flashcards, solving puzzles, participating in group activities, and integrating dance and music into lessons.

These fun-filled activities have encouraged students to observe, question, collaborate, and think critically. They have not only learned new concepts but have also unlearned the fear of mathematics and rediscovered it as an exciting and meaningful subject.

When children enjoy learning, they become confident learners. Through activity-based learning and real-life connections, our students are developing a positive attitude towards mathematics and understanding that every problem has a solution when approached with curiosity, perseverance, and the willingness to try.

After all, mathematics is not just a subject—it is a way of thinking, exploring, and making sense of the world around us.
